

Marmot Women's Trailway UPF 50 Short 7" – Gear Review

Overview

The Marmot Women's Trailway UPF 50 Short 7" is a lightweight hiking short designed for hiking, trekking, travel, and warm-weather outdoor adventures. Constructed from a recycled nylon stretch fabric with a C0 DWR finish, the Trailway combines mobility, durability, and sun protection in a streamlined package.

Weight

- Estimated Weight: **165–175 g (5.8–6.2 oz)**
- Marmot does not clearly publish the women's weight specification, but the men's version is listed at 172 g (6.0 oz).

Key Specifications

- Inseam: 7 inches
- UPF 50+ sun protection
- Recycled nylon stretch fabric
- C0 Durable Water Repellent finish
- Hand pockets and secure storage pocket
- Best Uses: Hiking, trekking, travel, walking

Comfort & Mobility

The stretch-woven fabric provides excellent mobility on the trail while maintaining a comfortable fit for all-day wear. The lightweight construction allows unrestricted movement during hiking and active travel.

Breathability & Weather Performance

The breathable nylon blend performs well in warm weather and dries quickly after sweat or light rain. UPF 50+ protection helps shield against prolonged sun exposure during long hikes.

Durability

The recycled nylon fabric balances durability and low weight. It stands up well to regular hiking use while remaining soft and comfortable against the skin.

Pocket Design

The streamlined pocket layout includes hand pockets and a secure storage pocket for trail essentials while keeping bulk to a minimum.

Pros

- Lightweight construction
- UPF 50+ protection
- Stretch fabric for mobility
- Quick drying
- Comfortable fit
- Versatile for hiking and travel

Cons

- Women's weight specification not clearly published
- Limited pocket organization
- Less stretch than premium softshell shorts

Best For

Hiking, trekking, travel, walking, and warm-weather outdoor adventures.

Editor's Rating: 9.2 / 10

The Marmot Women's Trailway UPF 50 Short 7" offers an excellent combination of comfort, mobility, durability, and sun protection. It is a strong choice for women seeking a lightweight hiking short that performs well both on the trail and during travel.
